* All prices are estimates only and vary with options, finish, species, and features selected at time of formal quote. Lead times are approximate.

Project Questionnaire

For a detailed cost proposal we'll need you to send us some photographs and/or drawings of the space where the proposed secret passageway will go. Ideally the images would be from a more zoomed-out perspective that will allow us to get a sense of the layout and the surrounding décor. Additionally, we'll need you to answer the following list of questions that apply to the best of your ability. Once we have this information we can usually have a cost proposal to you within 1 business day.

1 - What is the target budget for this project? If you do not have a budget, how would you describe the project? (i.e. extremely high-end, high-end, or medium. Note that Creative Home Engineering does not make lower-quality secret passageways so if you consider your project to be a low-end project you may want to search elsewhere.)

Knowing the budget will help us to propose options and features that will best suit your needs. _____

2 - What is the width of the rough door opening (stud to stud), height, and wall thickness? _____

3 - Are you more interested in a single cabinet, or a wall unit with a door section next to one or more stationary sections? If a wall unit, what is the height and length of the portion of the wall that will be covered with cabinetry? _____

4 - What finish do you prefer; paint grade, stain grade, painted by us, or stained by us to match samples? _____

5 - If the project will be stained, what is the wood type (species) you prefer? _____

6 - Should the door be an in swing (into the secret room) or an out swing (away from the secret room)? _____

7 - As you look at the front of the door, should the hinges be on the left side or the right side? _____

8 - In what architectural style should the project be designed? Do you have access to a photograph you could send us of any cabinetry that we should use for design inspiration? If so, please include it in an email with this questionnaire. _____

9 - Should the cabinet have a built-in look or look like a free-standing piece of furniture? _____

10 - Do you want cabinet doors at the bottom or shelves all the way down? _____

11 - Do you want your door to open and/or unlock automatically when your favorite book is pushed, candlestick twisted, fingerprint scanned, etc? What would be your ideal secret switch? _____

12 - How would you describe the security requirement for this door? Low, Medium, High, or Very High? _____

13 - What address will the door be shipped to? This is required to calculate shipping. All information is kept strictly confidential and is not used for any unsolicited contact. _____
